Chief Complaints

Primary clinical reasons for consultation

Severe headache, persistent fever, and body aches

Headache

Clinical SOAP Notes

History of present illness & physical findings

History of Present Illness (HPI)

Patient presents with high-grade intermittent fever for 3 days accompanied by throbbing frontal headache and generalized body aches.

Physical Examination Findings

Conscious, oriented, febrile to touch. Throat reveals mild erythematous congestion. Chest clear, no wheeze. CVS S1 S2 heard.

Special Advice & Dietary Instructions

Take adequate bed rest, hydrate with plenty of oral fluids. Avoid self-medication.
